

Diggin' Dirt – Vol. 2

Holy Smokes – It's almost May and there are still Easter Eggs to be found!!!! Where does the time go?

One of the great joys of planting flowers that slowly burst into wonderful colors is getting the color combinations right. And the definition of “right” is totally “your individual preference”.

Here are two that you may want to consider for your enjoyment this year.

Art Deco Zinnia

Bold, bright, majestic colors of pink, royal purple and lavender grace strong, sturdy plants reaching 36 in. high. Huge, 5-in. blooms make dramatic, long-lasting cut flowers. Also ideal in beds and borders.

Apricot Lemonade Cosmos

Fleuroselect Approved Novelty Winner. The 3-4 in. single flowers of Apricot Lemonade cosmos range in color from soft lemon yellow to pastel apricot. Many are adorned with a blush pink central halo and pink undersides to their petals. Compact, bushy 18-26 in. tall plants are early to bloom, and continue flowering well into fall if deadheaded – They make excellent cut flowers.

Looking for a garden center that you may not have heard of?
